About me

FullStack Software Engineer | Enterprise & Microservices

FullStack Developer experienced in building enterprisegrade, microservicebased applications using modern frontend and backend technologies. Strong across both frontend and backend development, with hands on experience taking products from concept to production. Built a complete Video Management System (VMS) from scratch, developing both its frontend and backend. Focused on scalable architecture, clean code, performance, and building reliable software for real business needs.

Job Experiences

Backend Java Developer
endico

March 2026 - Until Now

Full Stack Developer
Isiran

June 2023 - Until Now

Full-Stack Developer - Isiran
June 2023 - Present

- Develop and maintain **enterprise-grade applications based on microservices architecture**, working across both frontend and backend systems.
- Built a **Video Management System (VMS) from scratch**, taking ownership of both frontend and backend development.
- Developed core VMS features including **camera management, video wall management, hardware management, live camera monitoring, and role-based camera access for users**.
- Designed and implemented backend services using **NestJS, TypeScript, PostgreSQL, TypeORM, Kafka, Docker, MinIO, and Winston**.
- Built modern frontend interfaces using **React.js, TypeScript, Redux, Vite, Material UI, Tailwind CSS, and Fuse React**.
- Implemented secure **Authentication and Authorization** using **Keycloak**, including role- and permission-based access control.
- Integrated microservices through **Kafka** and containerized application services using **Docker**.
- Investigate and resolve **performance bottlenecks** across frontend and backend services to improve application reliability and responsiveness.

Fullstack Developer
segal rayane

June 2018 - June 2021

Frontend Developer & Programming Instructor - Segal Rayaneh

June 2018 - June 2021

- Delivered **project-based programming training**, teaching students how to build a complete e-commerce frontend from scratch.
- Taught **Java programming fundamentals and practical development concepts** through hands-on exercises and projects.
- Designed and developed a complete **e-commerce frontend template**, including multi-level navigation and administrative interfaces.
- Built responsive and reusable user interfaces using **JavaScript, jQuery, Material UI, and Tailwind CSS**.
- Guided students through the full frontend development process, from initial structure and UI implementation to a completed project.

Educations

Computer- software

Azad tehran markazi

Grade : Master's Degree

June 2025 - Until Now

Computer engineering

Islamic Azad University, Eslamshahr Branch

Grade : Bachelor's Degree

June 2021 - June 2025

Skills

JavaScript		TypeScript	
ReactJS		NextJs	
REST APIs		NodeJS	
NestJS		PostgreSQL	
SQL Server		Docker	
Kafka		Django	
Python		Spring boot	
Java		Redux	
TanStackQuery		TailwindCSS	
ant desgin			

Languages

English

Projects

spiceDB

Date: 2026

Backend Java Developer

- Developed a reusable authorization management layer around **SpiceDB**, enabling centralized fine-grained access control across multiple enterprise applications.
- Implemented functionality for **permission management, relationship-based authorization, and access policy evaluation**, simplifying authorization integration and administration.

Tech Stack: Java - Spring Boot - PostgreSQL - SpiceDB - REST API - gRPC API - Maven

Kong

Date: 2026

Backend Java Developer

- Built a reusable wrapper layer around **Kong Gateway**, simplifying API gateway operations and providing centralized management for enterprise services.
- Implemented APIs for **gateway configuration, route management, consumer administration, and plugin lifecycle management**.

Tech Stack: Java - Spring Boot - PostgreSQL - Kong Gateway - REST API - gRPC API - Maven

User Management Web App

Date: 2023

FullStack-Developer

- Developed a reusable management layer around **Keycloak**, enabling multiple enterprise applications to use a centralized identity and access management solution.
- Implemented functionality for **user and person management**, user account creation, and centralized administration.

Tech Stack: React.js - TypeScript - Java - Spring Boot - PostgreSQL - Keycloak - TanStack Query - Ant Design - Tailwind CSS - Vite - Maven

News Management Web App

Date: 2023

FullStack-Developer

- Contributed to the development of an enterprise **news management platform** for managing, publishing, and organizing news content.
- Built and maintained user-facing and administrative interfaces, including **user dashboards and admin settings panels**.
- Integrated secure **authentication and access management using Keycloak**.

Tech Stack: React.js - TypeScript - NestJS - PostgreSQL - Keycloak - TanStack Query - Ant Design - Tailwind CSS - Vite

Video Management System

Date: 2026

FullStack-Developer

- Built an enterprise **Video Management System from scratch**, covering both frontend and backend development.

- Developed features for **camera management, hardware management, video walls, live camera monitoring, and user-based camera access control.**

Tech Stack: React.js - NestJS - TypeScript - PostgreSQL - Kafka - Docker - Keycloak - MinIO
